Jan Whitworth, Permit Coordinator
Washington Department of Ecology
PV-11
Olympia, Washington 98504

Dear Ms. Whitworth:

A certificate of insurance for sudden accidental occurrences was recently submitted to EPA for three facilities owned and operated by Chemical Processors, Inc. Copies of the certificate and the accompanying documents are enclosed.

Liability limits in the certificate are less than that required, and the certificate fails to provide the exact wording required by the regulations. The accompanying information certificates do indicate that excess liability insurance has been obtained, but a valid certificate has not been issued for the excess policy. This matter is referred to the DOE for your enforcement consideration.

If you have any questions, I can be reached at 442-1254.

Sincerely,

A handwritten signature in cursive script, appearing to read "Andrew Boyd".
